

Northpeak Cold Chain

FICTIONAL SAMPLE DATA

Northpeak's predictive sensors cut pilot customers' spoilage by 31% and have reached 14 paying customers with 118% net revenue retention, and it is raising a \$4.0M Seed SAFE to scale sales.

paying customers	net revenue retention	Seed raise (SAFE)	post-money valuation cap	TAM
14 2026 [S4]	118% trailing 12 months [S4]	\$4.0M [S8]	\$16M [S8]	\$9.4B [S5]

PROBLEM

US regional food distributors lose 4-6% of perishable inventory to temperature excursions, and current loggers only report losses after the fact.

- **4-6%** of perishable inventory lost to excursions (2025 survey) [S2]
- **\$3.6M** annual spoilage write-offs, typical customer (annual) [S2]
- Figures come from the company's own survey of 40 distributors, not an independent study. [S2]

SOLUTION

Wireless sensors and prediction software alert warehouse staff about 6 hours before a temperature excursion, and install in one day per warehouse.

- **31%** spoilage reduction in pilots (6 months) [S3]
- **~6 hours** warning before excursion [S3]
- **\$1.1M** estimated annual savings per typical customer, range \$0.7M–\$1.1M [S2, S3] **EST.**

Not provided: Price per warehouse or per sensor

TEAM

Operator-led founding team pairing distribution operations with IoT engineering; the sales leader role is open.

- **Dana Whitfield**, CEO — Former VP Operations at a regional food distributor (12 years) [S7]
- **Ravi Menon**, CTO — IoT engineering lead; 2 prior startups, 1 acquired [S7]

Not provided: Head of Sales (hiring)

TRACTION

14 paying customers with 118% net revenue retention, plus 5 pilots and 3 signed letters of intent from national grocery chains.

- **14** paying customers (2026) [S4]
- **118%** net revenue retention (trailing 12 months) [S4]
- **5** pilots in progress (not paying) (2026) [S4]
- 3 signed letters of intent from national grocery chains; LOIs are not contracts. [S4]

Not provided: Revenue recognized to date; Gross margin actuals

MARKET SIZE

A \$1.1B US serviceable market, sized bottom-up, within a \$9.4B global cold-chain monitoring market.

- **\$9.4B** TAM (Global, 2026, third-party report) [S5]
- **\$1.1B** SAM (US regional distributors, 2026, bottom-up, 2,600 x \$420K) [S5]
- **\$33M** SOM (US regional distributors, 2031, share of SAM), range \$22M–\$44M [S5] **EST. FORECAST**

Not provided: Name and date of the third-party TAM report

COMPETITIVE ADVANTAGE

Predictive alerts rather than after-the-fact logging, backed by a model trained on 3.2 billion sensor readings.

- **3.2B** sensor readings in training data [S6]
- **2** US patents pending [S6]

Not provided: Named competitors and comparison

FUNDRAISE

Raising a \$4.0M Seed on a SAFE with a \$16M post-money valuation cap.

- **\$4.0M** Seed raise (SAFE) [S8]
- **\$16M** post-money valuation cap [S8]
- **\$0.6M** received from angels [S8]
- **\$1.5M** soft-circled (not committed) [S8]
- **\$3.4M** still to raise after cash received [S8] calc.

Not provided: Lead investor

USE OF FUNDS

Capital is weighted to product and sales, with an 18-month runway.

- **18 months** runway [S9] **FORECAST**
- Allocation: Product & engineering **40%** · Sales & marketing **35%** · Operations **15%** · G&A **10%** [S9]
- **\$3.5M** ARR by end of 2027 (company projection). [S9]

FORECAST

Not provided: Monthly burn

EXIT

The deck does not state an exit strategy.

Not provided: Exit strategy; Comparable transactions
